DESCRIEREA ACTIVITĂȚII PAS CU PAS	Pasul 1. Teacher asks students how they are feeling and invites them to

choose the appropriate adjective by using a Menti presentation.

Pasul 2.

Students will revise vocabulary related to money by matching the words to their definition. (Worksheet 1)

After discussing those terms, the Teacher sticks different „money stickers” on the students’ foreheads and explain that they are going to make 3 teams, as there are 3 different stickers. The teacher tells students that the image stuck on their forehead will be identical to that of the student walking towards them. Then she chooses 3 students with different images stuck on their forehead, and lets them know what the stickers are so that they can start forming the teams. The three students go round the classroom and find other students with the same image on the forehead. Each team is assigned a row of desks to sit in.

Pasul 3.

The teacher handles students a wordsearch puzzle and invite them to find at least 3 words related to „money”. The leader of each team will access menti.com and write the words they have found. In order to introduce the topic of the lesson, the Teacher asks students what outdoor activities they could do together if they came up with necessary funds. Next, students have to search for 3 words related to „barbecue” in the same wordsearch puzzle and write their words in the menti slide.

Pasul 4.

Teacher sets different tasks for each team:

Team 1: They get grocery flashcards (images), stick them on the whiteboard and match the groceries to their price, according to the given List of Prices worksheet.

Team 2: decide on the items they want to buy for their barbecue by checking the Barbeque CheckList Worksheet.

Team 3: make the budget for the barbecue according to the prices that Team 1 stuck on the whiteboard and taking into account what Team 2 chose to buy for the barbecue. The teacher presents the steps that may help students create a budget.

At this point, the members of all teams may collaborate to the budget of the barbecue. They may discuss upon the needed amount of groceries and the whole amount of money they have to spend.

Pasul 5.

The students present the budget/ cost of the barbecue and the amount of money they need to collect. If necessary, they will adjust the expenses to fit into the budget. The Teacher and the students discuss the most difficult issues in planning a budget for the barbecue.

Pasul 6.

The teacher asks students to offer feedback using a Mentimeter presentation. The Teacher makes remarks concerning students' activity during the English class and congratulates the members of the each team on their performance.
