I. Read the text below and for each question, choose the correct option A, B, C or D, which fits best according to the text.  $(5 \times 2 \text{ p} = 10 \text{ points})$ 

#### The Limits of Television Programming in the Modern Era

Television remains a dominant force in global entertainment, but its limitations have become increasingly apparent in recent years. While streaming services have revolutionised how audiences consume content, traditional TV networks still rely on rigid programming structures that often fail to meet the evolving preferences of viewers. As a result, many people feel restricted by outdated scheduling, repetitive formats, and a lack of creative risk-taking. The question remains: is television adapting quickly enough to remain relevant?

One major limitation is the reliance on predictable and formulaic content. Many networks prioritize commercially successful genres—such as reality TV, crime dramas, and talent shows—over innovative storytelling. This results in repetitive narratives that leave little room for originality. Risk-averse executives often avoid experimental formats for fear of alienating mainstream audiences, leading to a stagnation of ideas. While streaming platforms are more willing to push creative boundaries, traditional television struggles to break free from well-worn formulas.

Another significant issue is censorship and editorial control. Unlike online platforms, where creators have greater freedom, television programming is often subject to strict regulations regarding language, themes, and controversial topics. While this ensures content remains suitable for a broad audience, it also limits the ability of writers and producers to tackle important social and political issues in a meaningful way. The result is content that may feel sanitized or disconnected from the realities of modern society.

Furthermore, audience engagement is declining due to rigid scheduling and excessive advertising. In an era where viewers expect content on demand, the traditional TV model—with fixed broadcast times and long commercial breaks—feels increasingly outdated. Many people prefer streaming services, which offer uninterrupted, personalized viewing experiences. This shift in audience behaviour has forced networks to reconsider their approach, yet many still struggle to compete with the flexibility of digital platforms.

Despite these challenges, television is not obsolete. Many high-quality productions continue to emerge, and networks are beginning to experiment with new formats to attract younger audiences. However, unless television programming becomes more adaptable, diverse, and innovative, its relevance may continue to diminish in the face of ever-expanding digital alternatives. The future of TV depends on its ability to evolve with the expectations of modern viewers rather than remain confined by the limitations of the past.

#### 1. What does the writer suggest about television's ability to compete with digital platforms?

- A) It has successfully adapted to changing audience preferences.
- B) It faces challenges due to its rigid structures and cautious decision-making.
- C) It benefits from having a predictable and structured format.
- D) It is unaffected by the rise of streaming services.

#### 2. What is implied about the type of content preferred by television executives?

- A) They encourage experimentation and unique storytelling.
- B) They avoid commercially driven decisions when selecting programmes.
- C) They actively seek out content that challenges audience expectations.
- D) They prioritise formats that have historically performed well.

#### 3. How does the writer view the role of censorship in television programming?

- A) It ensures that television content remains relevant to a modern audience.
- B) It helps maintain quality and prevents poorly produced content.
- C) It limits creative freedom and prevents deeper discussions.
- D) It has no significant impact on the way stories are presented.

#### 4. What challenge does traditional television face in retaining audiences?

- A) Advertisements and inflexible schedules reduce engagement.
- B) Viewers appreciate the structured nature of scheduled programming.
- C) People are increasingly drawn to television over streaming platforms.
- D) Networks have effectively integrated digital strategies to attract viewers.

#### 5. What does the writer suggest about the future of television?

- A) It will likely disappear as digital platforms dominate.
- B) It can remain relevant if it embraces innovation and flexibility.
- C) It should continue following traditional programming methods.
- D) It will only survive if it eliminates competition from streaming services.

II. Your local television station wants to offer a wider variety of programmes to cater to viewers of all ages. Write a *proposal* suggesting different types of programmes that would engage a broad audience, from children to adults. Explain the benefits of offering such diversity in programming. (220-260 words). (50 points)
